

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

The University of Chicago Press

Chicago and the Old Northwest, 1673-1835. By Milo Milton Quaife, Professor of History in the Lewis Institute of Technology.

488 pages, 8vo, cloth; \$4.00, postpaid \$4.23

This book recounts, in a manner at once scholarly and dramatic, the early history of Chicago. Important as this subject is, it is not treated solely for its own sake. The author's larger purpose has been to trace the evolution of the frontier from savagery to civilization. From the point of view of Chicago and the Northwest alone the work is local in character, although the locality concerned embraces five great states of the Union; in the larger sense its interest is as broad as America, for every foot of America has been at some time on the frontier of civilization.

This task has never before been performed in an adequate way. The one really brilliant historian of Illinois, Mr. Edward G. Mason, died with only a few fragments of his great work completed, and no one has yet come forward to take his place. It is believed that this book will take rank as the standard history of Chicago in the early days.

Chicago Tribune. A history of the beginnings of Chicago which, because it is scientific and based upon records rather than upon tradition, may overturn existing chronologies on the same subject.

Animal Communities in Temperate America. A Study in Animal Ecology. By Victor Ernest Shelford, Instructor in Zoölogy in the University of Chicago.

380 pages, 8vo, cloth; \$3.00, postpaid \$3.22

This volume by Dr. Shelford presents the principles of field ecology, illustrated by the more widely distributed animal habitats of the eastern half of temperate North America, and the aquatic habitats of a much larger territory. Six chapters deal with general principles.

In several chapters animal communities of lakes, streams, swamps, forests, prairies, and various soils and topographic situations are considered from the point of view of modern dynamic ecology. A very valuable feature of the book is the

three hundred figures of widely distributed animals chosen to represent the chief types of animal communities and their characteristic modes of life.

Artificial Parthenogenesis and Fertilization. By Jacques Loeb, Member of the Rockefeller Institute for Medical Research.

318 pages, 12mo, cloth; \$2.50, postpaid \$2.68

This new work presents the first complete treatment of the subject of artificial parthenogenesis in English. Professor Loeb published four years ago a book in German under the title *Die chemische Entwicklungserregung des tierischen Eies*. Mr. W. O. R. King, of the University of Leeds, England, translated the book into English, and the translation has been revised, enlarged, and brought up to date by Professor Loeb. It gives, as the author says in the preface, an account of the various methods by which unfertilized eggs can be caused to develop by physico-chemical means, and the conclusions which can be drawn from them concerning the mechanism by which the spermatozoon induces development. Since the problem of fertilization is intimately connected with so many different problems of physiology and pathology, the bearing of the facts recorded and discussed in the book goes beyond the special problem indicated by the title.

The Mechanistic Conception of Life. Biological Essays by Jacques Loeb, Member of the Rockefeller Institute for Medical Research.

238 pages, 12mo, cloth; \$1.50, postpaid \$1.65

The achievements of Professor Jacques Loeb in the field of experimental biology insure any book of his a wide reading. His experimental work at the universities of Chicago and California, as well as in his present position, gives this volume an especial significance. Professor Loeb here presents many of the current problems in biology, and discusses the question whether the phenomena of life can be unequivocally explained in physico-chemical terms.

Johns Hopkins Hospital Bulletin. All eager to know more of the origin of life will find no modern book of its size nearly so instructive or inspiring.

A Manual for Writers. By John M. Manly, Head of the Department of English in the University of Chicago, and John A. Powell, of the University of Chicago Press.

226 pages, 12mo, cloth; \$1.25, postpaid \$1.35

A book designed to aid authors and all others who are concerned with the writing of English. It aims to answer the practical questions that constantly arise in the preparation of

manuscripts for the printer, business letters, and any sort of composition where correctness of form is an important element.

It treats in a clear and convenient way the matters of grammar, spelling, and general form which writers need most to be informed about, and gives full directions on the preparation of "copy" for the printer and the correcting of proof. The chapter on letter-writing is unique and of especial value in its practical suggestions.

C. E. Raymond, Vice-President of the J. Walter Thompson Co. It seems to me to be the most comprehensive and comprehensible of any of the works on this subject which I have had the pleasure of seeing.

The Elements of Debating: A Manual for Use in High Schools and Academies. By Leverett S. Lyon, of the Joliet High School.

148 pages, 12mo, cloth; \$1.00, postpaid \$1.07

The aim of the book is to put the well-established principles of the art of debating within the reach of young students. It therefore presents the elements of public speaking so freed from technicality that the student may assimilate them in the shortest possible time and with the least possible interpretation by the teacher.

The book consists of ten chapters and a number of appendices. Each chapter is preceded by an analysis of the subject and followed by a series of suggested exercises. The whole subject is treated in a direct, practical way with the greatest possible clearness, and with illustrations drawn from subjects familiar and interesting to high-school boys. It is entirely modern in that it lays stress on efficiency, rather than on theoretical perfection. Illustrations are given from some of the most effective arguments ever written, and a list of suggested topics is added in an appendix.

London in English Literature. By Percy Holmes Boynton, Assistant Professor of English Literature in the University of Chicago.

358 pages, 8vo, cloth; \$2.00, postpaid \$2.17

This volume differs from all other volumes on London in that it gives a consecutive illustrated account of London not from the point of view of the antiquarian but from that of the inquiring student of English literary history.

It deals with ten consecutive periods, characterized in turn by the work and spirit of Chaucer, Shakespeare, Milton, Dryden, Addison, Johnson, Lamb, Dickens, and by the qualities of Vic-

torian and contemporary London. The emphasis is thus distributed over history and given largely to the richer and more recent literary periods. The temper of each epoch is discussed, and then in particular those literary works which are intimately related to certain localities in London.

The work contains four maps and forty-three other illustrations, selected from the best of a great fund of material. As further aids to the student or the general reader, the sources of all material are indicated by footnotes and lists of illustrative reading are appended to each chapter. There are also an appendix with detailed references to illustrative novels, and a carefully compiled index.

The Springfield Republican. It would seem as if Mr. Boynton's book would make strong appeal to everybody who has been in London, and a good many more who would like to go there; . . . he has caught its spirit and presented it here.

Social Programmes in the West. (The Barrows Lectures.) By Charles Richmond Henderson, Head of the Department of Practical Sociology in the University of Chicago.

212 pages, 8vo, cloth; \$1.25, postpaid \$1.38

The Barrows Lectures (1912-13) delivered with so much success in the Far East by Professor Henderson are included in this volume, which is also published in India by the Macmillan Company. The subjects of the lectures are as follows: "Foundations of Social Programmes in Economic Facts and in Social Ideals," "Public and Private Relief of Dependents and Abnormals," "Policy of the Western World in Relation to the Anti-Social," "Public Health, Education, and Morality," "Movements to Improve the Economic and Cultural Situation of Wage-Earners," and "Providing for Progress." The author, in his preface, says that "the necessity of selecting elements from the social activities of Europe and America, which might have value in the Orient under widely different conditions, compelled a consideration of the materials from a new point of view." The introduction includes, besides a syllabus of the six lectures, the Letter of Commission from the officers of the three great international associations for labor legislation, asking the lecturer to present their aims wherever it was possible in India, China, and Japan. There is also included a statement by Professor E. Fuster, of Paris, of the aims of the international associations on social legislation.

Boston Transcript. The lectures will be of value to American readers in that they concisely place before them the social problem in its most fundamental aspects.

Christian Faith for Men of Today. By E. Albert Cook, Professor of Systematic Theology in the Congregational College of Canada.

276 pages, 12mo, cloth; \$1.25, postpaid \$1.35

This volume contains a clear and reasonable interpretation of life from the Christian point of view, and some definite formulation of those beliefs that have proved most effectual in the development of individual character and in the promotion of the welfare of society. Professor Cook believes that Christianity is the religion which best meets the needs of all races and classes. The convenient arrangement of the material in numbered paragraphs, the valuable appendices, and the general systematic treatment of the subject commend the book as a popular text for college men and women, and for adult classes and clubs as well as for general reading.

Watchman. It is written for those who feel the currents of thought of this age and have conceptions framed by science, sociology, and history, and need something more acceptable to their reason than current traditional conceptions. The treatment of the Scriptures is reverent but free, and does not disturb faith, but resets it according to modern conceptions.

Materials for the Study of Elementary Economics. By Leon Carroll Marshall, Chester Whitney Wright, and James Alfred Field, of the Department of Political Economy in the University of Chicago.

946 pages, 8vo, cloth; \$2.75, postpaid \$3.00

Special Library Edition, postpaid \$4.80

This volume of nearly a thousand pages is intended to supply to students of elementary economics a collection of readings, illustrating the working of economic principles in actual life. The material is drawn from the most various sources—books, magazines, newspapers, commission reports, court decisions, corporation charters, government circulars, etc. The selections have been carefully edited, so as to eliminate unsuitable material and present the documents in the most usable form.

The volume, which is intended to be used in connection with any standard text, has already been adopted by many of the leading institutions of the country.

Professor John Bauer, Cornell University. It ought to have a large demand from all classes of institutions.

Professor Charles C. Arbuthnot, Western Reserve University. *Materials for the Study of Elementary Economics* is altogether the most promising collection of illustrative material I have ever seen.

Outlines of Economics, Developed in a Series of Problems. By Members of the Department of Political Economy of the University of Chicago.

160 pages, interleaved, 12mo, cloth; \$1.00, postpaid \$1.13

This book is an attempt on the part of its authors to make some advances in the direction of improving the current methods of teaching the elementary course in economics. The ideals which have shaped the character of the book are: (1) A belief that the elementary course in economics offers exceptional opportunities for training in thinking and reasoning and that the inductive-problem method here used is the one best adapted to accomplish this end; (2) a desire to connect the theoretical principles of economics with the actual facts and with problems of the business world, and to induce the student to apply his knowledge of that world to the subject of study.

The result is a careful, analytical syllabus of the subjects usually covered in the introductory course, accompanied by some 1,200 questions and problems, designed: (a) to afford set problems for written work; (b) to guide the student in his reading, while fostering independent thinking; (c) to give direction to classroom discussion.

Nation. In their *Outlines of Economics, Developed in a Series of Problems*, three members of the Department of Political Economy in the University of Chicago have performed with remarkable thoroughness and grasp a task of great difficulty.

My Life. By August Bebel. (With a Portrait.) An Autobiography of the Famous Leader of the Social Democratic Party in Germany.

344 pages, 8vo, cloth; \$2.00, postpaid \$2.14

This autobiography contains the story, from the inside, of the rise of the German trades-unions, and throws many interesting sidelights on the politics of Bismarck and Lassalle. Up to the time of his death in August, 1913, Bebel was the molding influence of the Social Democratic party, which is, even under the restricted franchise, a power in the German state. Bebel gives a vivid description of the poverty of his early life and of his wanderings as a craftsman in search of work all through Germany—the Germany before the wars of 1864, 1866, and 1870–71, and before the Unification. Soon after his election to the Reichstag he was convicted of high treason for the expression of his views on the Franco-German War and had to spend some years in prison. The international reputation of the author, the extreme frankness with which he writes, and the striking suc-

cesses of the movement with which he is identified make this a human document of remarkable interest and significance.

The Nation. He is a rare narrator. . . . He humanizes a great cause, and by so doing makes it intelligible, and perhaps even appealing, to thousands who would otherwise pass by on the other side.

Francesco Petrarca and the Revolution of Cola di Rienzo. A Study in the History of Rome during the Middle Ages. By Mario Emilio Cosenza, Instructor in Latin in the College of the City of New York.

335 pages, 12mo, cloth; \$1.50, postpaid \$1.60

In these pages the author draws a picture of Petrarch as a statesman, believing that even if Petrarch had never written a sonnet in praise of Laura he would still be dear to many generations of Italians for having been the first real Italian patriot—a man who was not bounded by narrow partisanship but who through a long and active life was wholly devoted to the cause of a unified Italy. Dr. Cosenza has chosen for special treatment Petrarch's relations with Cola di Rienzo, because they constitute a story that is virtually a chapter in the history of Rome during the Middle Ages. The material of the present volume is drawn chiefly from Petrarch's letters, from the extremely important correspondence of Cola di Rienzo, and from the equally important archives of the Roman church. Nearly all this material is new to the English language. The notes are detailed enough to make clear Petrarch's many allusions. The book is written with the charm of a vital scholarship and with intimate feeling for its subject, and the incidents connected with the lives of the two great Italians who lived centuries in advance of their times have a remarkable variety and interest.

Boston Evening Transcript. As we read these extracts from the letters of Petrarca, and the scholarly notes that accompany them, we are convinced that, whatever the opinion of the papal court, Petrarca was a great statesman.

American Poems. Selected and Edited with Illustrative and Explanatory Notes and a Bibliography. By Walter C. Bronson, Litt.D., Professor of English Literature in Brown University.

680 pages, 12mo, cloth; \$1.50, postpaid \$1.68

The book offers a most carefully chosen and well-balanced presentation of the poetic works of Americans, covering the entire period of our history. For the teacher as well as the student the value of the work is greatly enhanced by the comprehensive Notes, Bibliography, and Indices. It is believed that

the book will have the wide popularity of Professor Bronson's earlier collection, *English Poems*, which has been adopted by all leading American colleges.

The Dial. The resources of the special collections of Brown University have supplied the editor with the best authorities for accurate texts, and have made possible the widest range of selections.

Education. Professor Bronson has done a real service to teachers and students of literature. . . . It is a truly adequate presentation of American poetry.

The Courts, the Constitution, and Parties. Studies in Constitutional History and Politics. By Andrew C. McLaughlin, Professor of History in the University of Chicago.

308 pages, 12mo, cloth; \$1.50, postpaid \$1.63

A volume of peculiar interest at this time, when the courts and political parties are subject to general criticism. The discussion is especially significant as coming from a lifelong student of constitutional questions, whose work at the University of Michigan, the Carnegie Institution of Washington, and the University of Chicago is so widely known. The point of view is historical. Though the articles are scientific they are intended for the reader who is interested in public affairs rather than for the professional student. The work consists of five papers, the first of which discusses the power of a court to declare a law unconstitutional. Two of the papers deal with the growth and essential character of political parties, and are followed by one on the history of differing theories of the federal Union. The work concludes with a discussion of the written constitution in some of its historical aspects, taking up the origin of these documents and the problems of their maintenance and interpretation in the development of the modern popular state.

Harvard Law Review. To the reviewer the two papers first mentioned seem to be contributions of great and permanent value to the discussion of their topic. . . . The style of these essays is easy and delightful and their argument sane, thoughtful, and persuasive.

Political Science Quarterly. Professor McLaughlin, in this most important essay under review, has surveyed the field anew, and with rare appreciation of the purport and the weight of evidence has contributed a judgment which may well be regarded as definitive.

Heredity and Eugenics. By John M. Coulter, William E. Castle, Edward M. East, William L. Tower, and Charles B. Davenport.

312 pages, 8vo, cloth; \$2.50, postpaid \$2.70

Leading investigators, representing the University of Chicago, Harvard University, and the Carnegie Institution of Washington,

have contributed to this work. Great care has been taken by each contributor to make clear to the general reader the present position of evolution; the results of experiments in heredity in connection with both plants and animals; and the enormous value of the practical application of these laws in breeding and in human eugenics. The volume is profusely illustrated.

British Medical Journal. Those who are desirous of arriving at an estimate of the present state of knowledge in all that concerns the science of genetics, the nature of the experimental work now being done in its various departments, . . . and the prospects, immediate or remote, of important practical applications, cannot do better than study *Heredity and Eugenics*.

The Assyrian and Babylonian Letters Belonging to the Kouyunjik Collections of the British Museum, Parts XII and XIII.
Edited by Robert Francis Harper, Professor of the Semitic Languages and Literatures in the University of Chicago.

Part XII, 134 pp., 4 colotypes. 8vo, cloth; \$6.00, postpaid \$6.14

Part XIII, 135 pp., 4 colotypes. 8vo, cloth; \$6.00, postpaid \$6.14

These two parts present further instalments of the texts of the Letter Tablets now to be found in the Kouyunjik Collections of the British Museum. Part XII contains the texts of one hundred tablets; Part XIII the texts of ninety-seven tablets. Part I of this series was published in 1892; and the series is now approaching completion. Part XIV is in preparation, and it is hoped to bring the remaining texts into Parts XIV, XV, and XVI. In Part XVII it is planned to give the results of a final collation of all of the texts, and to suggest many restorations which have not been included in the texts themselves. After the completion of the textual work, the author plans to continue with transliterations, translations, and philological notes. When completed this series will be a most valuable sourcebook for the history of the Sargon period.

PUBLICATIONS OF THE CAMBRIDGE UNIVERSITY PRESS

THE University of Chicago Press has become the American agent for the scientific journals and the following books issued by the Cambridge University Press of England:

BOOKS

The Life and Correspondence of Philip Yorke, Earl of Hardwicke, Lord High Chancellor of Great Britain. By Philip C. Yorke, M. A. Oxon., Licencié-ès-Lettres of the University of Paris.

Royal 8vo. Three Vols., with six illustrations. Vol. I, pp. 702; Vol. II, pp. 606; Vol. III, pp. 662. Price \$13.50, postpaid \$14.22

This solid and significant work is based on the Hardwicke and Newcastle manuscripts and, in addition to the life of Lord Hardwicke, gives the whole history of the Georgian period from 1720 to 1764. An account of the great judge's work in the King's Bench and in Chancery is included. The characters and careers of Walpole, Newcastle, Henry Pelham, the elder Pitt, Henry Fox, the Duke of Cumberland, George II, and George III and various incidents—such as the fall of Walpole, the Byng catastrophe, and the struggle between George III and the Whigs—appear in a clearer light, which the author, by aid of original papers and manuscripts, has been enabled to throw upon them. These documents are now published, or brought together and annotated, for the first time.

The North American Review. It corrects errors of previous ill-informed or prejudiced biographers of Lord Hardwicke, and presents an apparently just portrait of a really eminent man, together with a wealth of historical information.

The Genus Iris. By William Rickatson Dykes. With Forty-eight Colored Plates and Thirty Line Drawings in the Text.

254 pages, demi folio, half morocco; \$37.50, postpaid \$38.36

This elaborate and artistic volume brings together the available information on all the known species of Iris. The account of each includes references to it in botanical literature and a full description of the plant, together with observations on its peculiarities, its position in the genus, its value as a garden plant, and its cultivation. As far as possible the account of the distribution of each species is based on the results of research in the herbaria of Kew, the British Museum, the Botanic Gardens

of Oxford, Cambridge, Berlin, Paris, Vienna, and St. Petersburg, and the United States National Museum at Washington.

The most striking feature of the book is the forty-eight life-size colored plates, reproduced from originals drawn from living plants—making it a volume of great beauty as well as of scientific importance.

The American Florist. Lovers of irises owe a huge debt of gratitude to William Rickatson Dykes, who after years of labor has produced a magnificent work on these plants. . . . Mr. Dykes combines the scientist's analytical skill with all the grower's enthusiasm.

The Florists' Review. If anything else could be added to the book that would really increase its beauty or its scientific value or its practical utility, the present reviewer is curious to know what that addition could be.

Byzantine and Romanesque Architecture. By Thomas Graham Jackson, R.A. Two Volumes, with 165 Plates and 148 Illustrations.

Vols. I and II, each 294 pages, crown quarto, half vellum; two vols. \$12.50, postpaid, \$13.25

This work contains an account of the development in Eastern and Western Europe of Post-Roman architecture from the fourth to the twelfth century. It attempts not merely to describe the architecture, but to explain it by the social and political history of the time. The description of the churches of Constantinople and Salonica, which have a special interest at this time, is followed by an account of Italo-Byzantine work at Ravenna and in the Exarchate, and of the Romanesque styles of Germany, France, and England. Most of the illustrations are from drawings by either the author or his son, and add great artistic value to the volumes.

The Nation. The two volumes must surely take their place among the standard classics of every architectural library.

The Duab of Turkestan. A Physiographic Sketch and Account of Some Travels. By W. Rickmer Rickmers. With 207 Maps, Diagrams, and Other Illustrations.

580 pages, royal 8vo, cloth; \$9.00, postpaid \$9.44

A record of exploration of a little-known region, combined with some elementary physiography. The book discusses the various geographical elements in the natural organic system of the Duab of Turkestan (or Land between the Two Rivers) between the Oxus and the Jaxartes, the information being strung on the thread of a highly interesting story of travel and mountain exploration. The author was at great pains to obtain typical views of physical features such as mountains, valleys, and glaciers,

and also of vegetation, village life, and architecture; and there are many diagrams for a clearer understanding of the text.

The book is especially suitable for colleges, libraries, and schools, and for all students or teachers of physical geography and natural science.

The Journal of Geography. The author's delicate touches of humor, his picturesque language in description, and his knowledge of physiography and climatology, . . . all contribute materially to the excellence of the book. Much attention is given to physiographic processes and features, but the splendid half-tones tell the story better than words.

JOURNALS

Biometrika. A journal for the statistical study of biological problems.

Edited by KARL PEARSON. Subscription price, \$7.50 a volume; single copies, \$2.50.

Parasitology. Edited by G. H. F. NUTTALL and A. E. SHIPLEY. Subscription price, \$7.50 a volume; single copies, \$2.50.

Journal of Genetics. Edited by W. BATESON and R. C. PUNNETT. Subscription price, \$7.50 a volume; single copies, \$2.50.

The Journal of Hygiene. Edited by G. H. F. NUTTALL. Subscription price, \$5.25 a volume; single copies, \$1.75.

The Modern Language Review. Edited by J. G. ROBERTSON, G. C. MACAULAY, and H. OELSNER. Subscription price, \$3.00 a volume; single copies, \$1.00.

The British Journal of Psychology. Edited by W. H. R. RIVERS and C. S. MYERS. Subscription price, \$3.75 a volume.

The Journal of Agricultural Science. Edited by PROFESSOR R. H. BIFFEN, A. D. HALL, and PROFESSOR T. B. WOOD. Subscription price, \$3.75 a volume; single copies, \$1.25.

The Biochemical Journal. Edited for the Biochemical Society by W. M. BAYLISS and ARTHUR HARDEN. Subscription price, \$5.25 a volume.

The Journal of Ecology. Edited for the British Ecological Society by FRANK CAVERS. Subscription price, \$3.75 a volume; single copies, \$1.25.

NOTE.—Prices on back volumes vary, and postage from London is charged on back volumes and single copies.
